Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

That exception is the much-discussed group of silver coins of the fifth and fourth centuries b.c, generally attributed to the rulers of Gaza, and including the famous unique piece in the British Museum with the representation of Yahu or Yahweh (Pi. no.1). These coins do not properly fall within the scope of the paper, and I forbear accordingly from dealing at length with this much disputed piece. I will only make two remarks. Second, this coin is only one of a large group, which represents the most miscellaneous assemblage of deities and monsters. Assyria and Egypt, not to speak of Greece, lend types to these coins (Pi. nos.2, 3);and there seems to be little doubt that the coins were made by people who put on them any types which were likely to attract their customers. Thus the types of archaic Greek, notably Athenian, coins which circulated in the Philisto-Arabian district were freely imitated.
