Condition: New. Publisher/Verlag: De Gruyter | Patient Safety emphasizes the reporting, analysis and prevention of medical errors that very often leads to adverse healthcare situations. 1 in 10 patients are impacted by medical errors. The WHO calls the patient safety issue an endemic concern. A number of well-known experts of all areas in the medical field have collected very valuable information for a better patient treatment and higher safety culture in all medical disciplines. | The global medical process is a chain of different medical multidisciplinary procedures. The success in global Patient Safety will depend on the Safety of the consecutive medical processes that intervene in this complex system. Laboratory data is an essential part of health care, indeed it is used in 70% of clinical decisions. Inappropriate laboratory test over requesting is extremely frequent. The prevalence of under requesting has been less studied. The consequences of under requesting are clear, we are missing a diagnosis. Inappropriate over requesting can result not only in a problem of cost but also in a problem regarding patient safety. Additionally, another important consequence of inappropriate tests over requesting is that such amount of unnecessary tests has probably contributed to a significant increase in the volume of those over the last years. In all, there is general consensus that the inadequacy of test requesting must be corrected through strategies and monitored over time through indicators to assure the optimal laboratory contribution to clinical decision-making and patient safety. | Format: Paperback | Language/Sprache: english | 223 gr | 241x169x6 mm | 100 pp.
