By Edited by Paul F Kisak

Createspace Independent Publishing Platform, 2016.
Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Munitions are anything that can be used in combat including bullets, bombs, missiles, warheads, mines, artillery and rockets. Munitions is the collective term for all material used in war. The purpose of munitions is to project force against a selected target. However, the nature of munitions includes delivery or combat supporting munitions such as pyrotechnic or incendiary compounds. Since the design of the cartridge, the meaning has been transferred to the assembly of a projectile and its propellant in a single package. Ammunition involves the application of fire to targets, general use of weapons by personnel, explosives and propellants, cartridge systems, high explosive projectiles (HE), warheads, shaped charge forms of attack on armor and aircraft, carrier projectiles, fuses, mortar ammunition, small arms ammunition, grenades, mines, pyrotechnics, improved conventional munitions, and terminally guided munition. This book is designed to be a reference and provide an overview of the topic and give the reader a structured knowledge to familiarize yourself with the topic at the most affordable price possible. The accuracy and knowledge is of an international viewpoint as the edited articles represent the...
